RE: Seeking IT Co-op Work Term for Summer 2025

Dear Sir/Madam,

I am excited to apply for the co-op position for the Summer 2025 term, which I discovered on your company's career website. I am currently a student at Seneca College, pursuing an Honours Bachelor of Software Development. My program focuses on core software development skills, including C, C++, JavaScript, HTML, CSS, database management, and system administration.

In my previous role as an IT Support Analyst at JP PharmaChem, I gained hands-on experience troubleshooting hardware, software, and network issues, managing user accounts, and supporting database operations with tools like Oracle SQL and MongoDB. I have also worked on projects such as a Web-Based Inventory Management System and a Customer Order Tracking System, which allowed me to apply my software development skills in real-world scenarios.

I am eager to contribute to your team and apply my skills in software development and database management. I believe my technical background, problem-solving abilities, and hands-on experience will enable me to make a meaningful contribution to your organization.

I look forward to the opportunity to discuss how I can contribute to your team. I am available at your convenience for an interview and can be reached by phone or email.

Thank you for considering my application.

Sincerely,
Krish Barot
